

PROFESSIONAL PROFILE

Certified Microsoft developer and Senior Full Stack Engineer with 11+ years of experience designing, developing, and delivering scalable cloud-native applications using .NET, React, and Azure across media streaming, healthcare, energy, banking, e-commerce, and public sector domains.

Strong expertise in backend service development, REST APIs, distributed systems, React-based frontend engineering, TDD, database engineering, system design, SOLID principles, security, Azure cloud services, and Agile delivery.

Built reusable libraries and framework baselines, contributed to architecture and design reviews, led user story estimation and code reviews, mentored team members, and consistently drove engineering quality, performance, and delivery excellence.

Targeting Senior Full Stack Engineering roles with emphasis on modern .NET services, React applications, cloud-native architecture, and platform modernization.

EXPERTISE/SKILLSET

Technical Expertise: C#, .NET Core, .NET 8, React, TypeScript, JavaScript, OOP, REST API, SQL, EF Core, LINQ, Redux, MVC, HTML, CSS, jQuery, NoSQL, Unit Testing (nUnit & xUnit), VS Code, Visual Studio, SonarQube, Azure DevOps, CI/CD pipelines, GitHub Copilot, Bootstrap, Material UI, Terraform, YAML, Docker.

Methodology: Microservices, Cloud Design Patterns, SOLID Principles, Agile Development, Cloud Migration & Modernization, TDD, Containerization, Authentication and Authorization, CQRS, Database Performance, Code Quality, Performance Optimization, System Design (HLD & LLD), Data Structures & Algorithms, Problem Solving, Responsive Design.

Cloud Services: APIM, Azure Functions & Durable Orchestration, Web Apps, App Config / Key Vault, Data Factory, Data Explorer, SQL Databases, Cosmos DB, Redis Cache, Storage Services, Event Streaming Services, SignalR, Docker Services.

Secondary skills/Learning: Azure OpenAI Service, Azure Agentic Service, GitHub Services, Azure Kubernetes, React Native

EXPERIENCE

MICROSOFT, Hyderabad, IN (Jan 2018 – Present)

Senior Full Stack Engineer (.NET Core, ReactJS, Azure PaaS, EF, LINQ, Azure DevOps, SRE) delivering end-to-end solutions for Microsoft enterprise customers with focus on backend APIs, distributed architecture, cloud modernization, and engineering excellence.

- Designed scalable backend services and REST APIs using .NET Core for enterprise-scale platforms across healthcare, media, energy, and government engagements.
- Built modern React-based applications and dashboards integrated with backend services, enabling operational visibility, workflow execution, and real-time user experiences.
- Delivered cloud-native solutions on Azure using Functions, APIM, Cosmos DB, Redis, Key Vault, and event-driven patterns to improve scalability, reliability, and maintainability.
- Led and contributed to architecture discussions, estimation, and solution baselining with customers, architects, and cross-functional teams across multiple enterprise programs.
- Improved engineering quality through CI/CD, SonarQube integration, security fixes, and test automation; maintained more than 90% code coverage on MTN and achieved 80%+ coverage with zero security bugs on Eaton.
- Optimized platform performance at scale, including improving MTN static masking throughput from over 4 hours to about 2 hours for 60 million records and reducing API latency from 3–5 seconds to under 10 milliseconds.
- Led NHS delivery for a team of 4 engineers across 9 sprints, driving architecture, code reviews, unblockers, and delivery of critical patient-risk modules.

VIRTUSA, Gurgaon, IN (Aug 2016 – Jan 2018)

Full Stack Consultant (.NET, ReactJS, DevOps using Jenkins & TeamCity, EF, LINQ, Caching, Unit Testing)

Delivered banking pricing and decisioning solutions using .NET and frontend integration in Agile environments, while automating build and deployment processes to improve release reliability.

- Collaborated with analysts and clients during requirement gathering, sprint ceremonies, and technical discussions to translate business needs into implementation plans.
- Developed new features, resolved defects, and optimized application behavior for banking pricing workflows and decision-support scenarios.
- Configured CI/CD pipelines in Jenkins and TeamCity to streamline builds, deployments, and development efficiency.

CLAVAX LLC, Gurgaon, IN (Nov 2015 – July 2016)

Senior Associate Programmer (Azure PaaS, ASP.NET MVC, EF, LINQ, Caching, AngularJS, Jira, GitLab)

Built and enhanced e-commerce and warehouse management platforms on Microsoft technologies and Azure, improving website performance and backend automation.

- Modernized legacy applications from WinForms to MVC with Angular and migrated database workloads from on-premises environments to Azure cloud services.
- Developed Selenium-based order automation to purchase and track books from Amazon, eBay, ValoreBooks, AbeBooks, and Goodreads, reducing manual effort and improving order throughput.
- Integrated PayPal and cyber credit verification APIs to support secure online payment and card validation workflows.
- Implemented automated processing workflows using WebJobs and Data Factory to reduce processing time and operational overhead.

E-CONNECT SOLUTION PVT LTD, Udaipur, IN (July 2014 – Oct 2018)

Software Developer (EF, LINQ, ADO.NET, ASP.NET MVC, Web Forms, SQL Server, jQuery, JavaScript)

Contributed to the digital transformation of state government platforms, focusing on project baselining, architecture setup, and delivery of enterprise web applications.

- Designed business and data access layers for multiple applications from scratch, improving maintainability, system structure, and performance.
- Implemented reusable role-based access and user management capabilities, strengthening authorization and security across applications.
- Created JavaScript validation libraries, exception-handling utilities, and SMTP-based notification components to improve reliability and development efficiency.
- Developed reusable search controls and shared components that reduced effort across projects and accelerated application delivery.
- Prepared project specification and release documentation to support stakeholder alignment and smoother production rollouts.

RECENT PROJECT

Media Streaming Platforms: Built a real-time operations portal for basketball game streaming, live scorecard visibility, incident tracking, telemetry monitoring, and troubleshooting support using React dashboards and backend services.

National Health Service (NHS) UK: Built an AI-driven platform for knee and hip surgery risk prediction using Azure Machine Learning, .NET, and React. Led a team of 4 developers for 9 sprints and delivered patient risk analysis, waiting list, and upload modules for surgeon and clerical users.

Commercial Banking Solutions: Developed banking product pricing and decision-support systems that stored product rates and customer information and provided real-time product suggestions based on captured customer interest.

E-commerce Platform / Warehouse Management: Built an online book commerce and warehouse platform with automated backend purchasing scripts that integrated Amazon, eBay, Valore, and AbeBooks, updated stock, and tracked order lifecycle end to end.

State Govt ERP Portal: Delivered HRMS, payroll, attendance, WPS, loan, land management, grievance, and role-based workflow capabilities for large-scale government users and administrators.

E-Learning Portal: Developed a cloud-based learning management system supporting ADMIN, CUSTOMER, INSTRUCTOR, and USER/STUDENT roles with UI, database, content, and user management capabilities.

CERTIFICATIONS

GHCP CERTIFIED DEVELOPER | MICROSOFT AI ENGINEER ASSOCIATE | MICROSOFT AZURE ADMINISTRATOR ASSOCIATE | AZURE DEVELOPER ASSOCIATE | MCSA: WEB APPLICATIONS | MCSA: CLOUD PLATFORM | MICROSOFT CERTIFIED: SECURITY, COMPLIANCE, AND IDENTITY FUNDAMENTALS | MICROSOFT AZURE AI FUNDAMENTALS

EDUCATION

B.TECH in CSE [70 %] From GEETANJALI INSTITUTE OF TECHNICAL STUDY (RAJASTHAN TECHNICAL UNIVERSITY)

ACHIEVEMENT

BEST PROJECT CONSULTANT AT MICROSOFT | BEST CONSULTANT AT VIRTUSA | SPOT AWARD AT VIRTUSA
